

## Centre d'Immunologie de Marseille-Luminy

### Postdoctoral position

#### Laboratory of Toll-Like Receptors in immunity

A post-doctoral position in Immunology is immediately available in the laboratory of Toll-like receptors in immunity directed by Dr. Lena Alexopoulou, at the Center of Immunology of Marseille-Luminy.

The position is funded by the French Ministry of Research (ANR) for 2 years.

The successful applicant will apply a broad range of cellular and molecular techniques to study the role of Toll-like receptors (TLRs) in host's immune responses using gene-targeted knockout mice and various infectious mouse models.

Applicants should have a Ph.D., a strong background in immunology and be highly motivated. Laboratory experience in cellular and molecular biology techniques is required and previous experience with mice will be an advantage. Please send full CV including publications, summary of current research, and the contact information of 3 referees by e-mail to:

Lena Alexopoulou, Ph.D.
