

"ALEXANDER FLEMING"
Biomedical Sciences Research Center

Scientific manager, BSRC Fleming

The Biomedical Sciences Research Center 'Alexander Fleming' (www.fleming.gr) is seeking a **scientific manager** with a proven track record in management and coordination of research and infrastructure projects, to support the Center's Director.

Candidates must have a PhD in Biosciences and related postdoctoral experience, strong written and oral communication skills, high organization, management and coordination abilities, as well as excellent command of the Greek and English language. Experience with the coordination of European and national projects is considered an asset.

The successful candidate will work in close contact with the Director of the Center and his research team, to support research and infrastructure development projects, such as the national infrastructures [InfrafrontierGR](#), [pMedGR](#), and others). His/her duties will include: coordination of project working groups, coordination and follow up of project deliverables, coordination and preparation of reports and manuscripts for publication, liaising between the Director and the research partners, overview of procurement calls and personnel recruitment, preparation and dissemination of press releases, curation of project websites, organization of network meetings, communication with European infrastructures and alignment of activities, participation in meetings and relevant working groups.

Expressions of interest should be sent electronically to kollias.admin@fleming.gr. Candidates should email a cover letter outlining their interests and areas of expertise (maximum 1 page long), together with a curriculum vitae, including contact information of two or more referees.

Deadline for expression of interest: 14 June 2019

BSRC Fleming is a top-ranked Greek non-profit research organisation focusing on scientific and technological excellence, training and innovation in biomedical sciences. The Center was established in 1998, and operates under the supervision of the General Secretariat for Research and Technology (GSRT) of the Hellenic Ministry of Education. Competitive funding each year amounts to 75–85% of the total budget of the Center, an achievement that underlies Fleming's strategic prioritization of research and innovation.

The Center has gained international recognition for its pioneering research towards understanding the molecular and cellular basis of human diseases such as autoimmune diseases, cancer, neurodegenerative disorders, osteoporosis, pulmonary fibrosis and others, and the development of new approaches for their diagnosis and treatment. Fleming's strength and international visibility lies on its focus and success in developing and characterizing animal models that mimic human disease and the Center has consequently invested heavily on related infrastructures.
