

Dr Fani Roumelioti was born in Athens, Greece. She obtained her diploma in 2010 at the Biology Department in the University of Athens. She then pursued a 2-year Master Program co-held by the Biology Department and the Medical School in the University of Athens. In April 2013, she joined Prof. George Kollias's laboratory, where, in 2014, she started her doctoral studies focusing on the *in vivo* role of non-coding RNAs in the *huTNFtg* mouse model of arthritis and obtained a PhD degree from the Medical School of the University of Athens in 2022. Currently, she is working as a postdoctoral researcher in Prof. George Kollias's laboratory and she is involved in investigating the role of synovial fibroblasts and downstream TNF/TNFR signaling in rheumatoid arthritis aiming at identifying novel therapeutic approaches.
