<https://twitter.com/pmoulos>

I am a bioinformatician with strong computational, mathematical and statistical backgrounds and rich experience in research as well as scientific software development. I believe that the progress of any modern scientific domain includes multidisciplinarity and biology with statistics and computer science, which are now permanently bound together, are perfect examples of multidisciplinary scientific progress and the future of healthcare. One of my strongest points is my focus and my passion for perfectionism regarding my work and the success of any project I am involved in.

Key achievements

Research and development

- Active bioinformatics support and development of clinical reporting process in the precision medicine unit at BSR Alexander Fleming, in the framework of the Hellenic Precision Medicine Network in Oncology and support of the underlying regulatory procedures
- Supervision and contribution in the development and assessment of clinical pharmacogenomics and nutrigenetic SNP panels in collaboration with the private sector (PMID: 33858454 and Kapellou et al., under review)
- Contribution in Fibromine development, a curated multi-omics resource in pulmonary fibrosis (PMID: 34741074)
- Active involvement in the analysis of SARS-CoV-2 genomes during the COVID19 pandemic in Greece (PMID: 34190583, 34576169, 34675930)
- Complete bioinformatics analysis for elucidating the role of non-pioneer transcription factors CEBP α and HNF4 α in transcriptional and epigenomic regulation and network interplays during liver development in mice (PMID: 32023452)
- Development of integrated algorithms for RNA-Seq data analysis focusing on immunity to normalization methods and unbiased downstream functional analysis (PMID: 32778872)
- Development of integrated algorithms for the detection of differential splicing and isoform expression from RNA-Seq data using Machine Learning techniques (PMID: 34698224)
- Bioinformatics insights in refining a steroidogenic model from *Bombyx mori* prothoracic glands through the analysis of respective RNA-Seq data (PMID: 30005604)
- Bioinformatics insights in the elucidation of Kmt5a as a major controller in hepatic metabolic pathways through mediating H4K20 monomethylation (PMID: 28746875)
- Bioinformatics insights in the elucidation of Smyd3 as a key player among multiple cancer-promoting genes required for liver and colon cancer development (PMID: 26908355, 27245698)
- Integrative bioinformatics analysis, including handling of big datasets (TCGA consortium), assisting in the discovery of a positive regulatory loop between a Wnt-Regulated, with potential therapeutic properties, non-coding RNA and the ASCL2 gene which controls intestinal stem cell fate (PMID: 27292638)
- Gene expression analysis during the investigation of Set8 as a potential player in the development of hepatocellular carcinoma (PMID: 25515659)
- Bioinformatics transcriptome analysis of UUO mouse models in renal fibrosis (PMID: 27189340)
- PANDORA algorithm for systematic integration of RNA-Seq statistical algorithms for accurate detection of differential gene expression patterns (PMID: 25452340, 32778872)
- A novel method and web application for the identification of internal standards for the normalization of CE/MS data (PMID: 27694997)

Software

- *recoup*: an R/Bioconductor package for comprehensive analysis, summarization and visualization of Next Generation Sequencing signals (PMID: 33407065, <https://github.com/pmoulos/recoup>)

- *metaseqR2*: an R/Bioconductor package for the systematic integration of RNA-Seq statistical algorithms, robust data normalization, comprehensive downstream analysis and fully interactive result reporting (PMID: 32778872, <https://github.com/pmoulos/metaseqR2>)
- *SeqCVIBE*: an R Shiny application for the analysis, exploration, curation and visualization of big RNA-Seq datasets (manuscript in preparation, <https://github.com/hybridstat/seqcvibe>)
- *metaseqR*: an R/Bioconductor package for the systematic integration of RNA-Seq statistical algorithms and interactive result reporting (PMID: 25452340)
- The Kidney and Urinary Pathway Knowledge Base (*KUPKB*) and the *KUPNetViz* applications for knowledge mining and gene network visualization in kidney disease (www.kupkb.org, PMID: 23883183, 22345404)
- *cinnamoned*: a web application for the CE/MS data processing and normalization based on internal standards (PMID: 27694997, <https://github.com/pmoulos/cinnamoned>)
- *StRAnGER*: Hybrid parametric and non-parametric prioritization and enrichment analysis of Gene Ontology annotations (<http://grissom.gr/stranger/>, PMID: 21293737)
- *Gene ARMADA*: software for the analysis of gene expression microarray data (<https://github.com/pmoulos/gene-armada>, PMID: 19860866)

Education

3/2007 – 3/2011: PhD in Bioinformatics, School of Chemical Engineering, National Technical University of Athens, Thesis Title: Development of Bioinformatics Methodologies for the Study of Highly Complex Biological Systems

9/2004 – 7/2005: DEA (MSc) Bioinformatique, Université Libre de Bruxelles, Thesis Title: Feature Selection and Stability Analysis for Classification using Microarray Data

9/1999 – 7/2004: School of Applied Mathematics and Physics, National Technical University of Athens, Majors: Computer Science Mathematics, Statistics, Thesis Title: Models of Cellular Control and Emergent Phenomena in Multicellular Systems

Positions

10/2020 – Present: External collaborator in Bioinformatics, Center of New Biotechnologies & Precision Medicine, pMedGR, Athens Medical School, National Kapodistrian University of Athens.

8/2020 – Present: Associate Staff Scientist, Bioinformatics, Biomedical Sciences Research Center ‘Alexander Fleming’, Vari, Greece.

8/2017 – 7/2020: “Stavros Niarchos” Foundation Researcher in Bioinformatics, Biomedical Sciences Research Center ‘Alexander Fleming’, Vari, Greece with focus on the development of novel integrated analysis algorithms for genomics data.

4/2014 – Present: Co-founder at HybridStat Predictive Analytics (www.hybridstat.com): Bioinformatics consulting and services, software development for the analysis of big biological data.

6/2012 – 7/2017: Post-doctoral researcher at the Biomedical Sciences Research Center ‘Alexander Fleming’, Vari, Greece, working on the analysis of Next Generation Sequencing data and the development of new analytical approaches for deep sequencing data.

5/2011 – 5/2012: Post-doctoral researcher at Inserm (U1048, I2MC), Toulouse, France, working on the development of a pipeline for the analysis of CE/MS data with focus on the statistical identification of internal normalization standards and of a visualization interface for visualizing Semantic Web relationships stored in the Kidney and Urinary Pathway Knowledge Base (*KUPKB*).

9/2006 – 3/2011: Bioinformatics research assistant with focus on the analysis and meta-analysis of high-throughput functional genomics data, Metabolic Engineering and Bioinformatics Group, Institute of Biological Research and Biotechnology, National Hellenic Research Foundation.

4/2008 – 12/2008: Visiting researcher/bioinformatician in the laboratory of Prof. Henk G. Stunnenberg (NCMLS, Radboud University, Nijmegen, Netherlands), working on standardization, normalization, statistical analysis and analysis workflow organization for Next Generation Sequencing (ChIP-Seq) data.

1/2002 – 12/2009: Other activities: Statistical analysis of questionnaires and technical report writings, private courses in Statistics to students (university level), IT training of SME employees and IT support, teaching assistance during PhD.

Languages

English (excellent), French (excellent), Greek (mother tongue)

Skills

- Excellence with the use of various bioinformatics analysis tools and methodologies with focus on genome bioinformatics/genomics. Indicatively:
 - Next Generation Sequencing data analysis (computational pipelines setup for a variety of -Seq protocols, sequence alignment, data preprocessing, normalization, analysis and visualization)
 - DNA microarray data analysis (data preprocessing, normalization, statistical analysis, data mining, pathway and network analysis)
 - Biological sequence and DNA motif analysis
- Familiarity with a variety of biological databases with focus on genomic and small molecule data:

- Biological sequences and DNA motifs (RefSeq, GenBank, TRANSFAC, JASPAR etc.).
- High-throughput genomic data (GEO, SRA, ArrayExpress, SMD, ArrayTrack etc.).
- Biological small molecules (KEGG Compound, ChEBI, HMDB, METLIN)
- Databases of clinical focus (Clinvar, gNOMAD, DisGeNET, HPO, dbSNP, dbNSFP, PharmGKB etc).
- Metabolomic MS data analysis (preprocessing, peak detection, normalization, statistics, database search).
- Excellent operation of engineering and statistical packages R, MatLab, Minitab, SPSS.
- Experience in regulatory process development, application and maintenance for clinical labs and clinical software management (ISO 15189, ISO 13485).
- Application programming/development
 - Programming languages: Perl, Python, MatLab, R
 - Web development: PHP, HTML, JavaScript, jQuery, Meteor.js, R Shiny
 - Database systems: MongoDB, MySQL
- Excellent familiarity with data mining techniques (feature selection, classification and regression algorithms)

- Mitsiou, D.J., McCalman, M.T., **Moulous, P.**, Rao, A.S.N., Megens, E., Alexis, M.N., Kolisis, F.N., Stunnenberg, H.G., Genome-wide profile of glucocorticoid receptor binding sites, 8th EMBL Transcription Meeting, Heidelberg, Germany, 2008 (Poster)
- **Moulous, P.**, Chatzioannou, A., Papadodima, O., Magkouta, S., Roussos, C., Loutrari, H., Kolisis, F.N., Microarray analysis of lung adenocarcinoma gene expression in response to mastic oil: prediction putative target pathways, QMB Workshop, Spetses, Greece, September 1-8, 2008 (Poster)
- Papadodima, O., **Moulous, P.**, Chatzioannou, A., Loutrari, H., Roussos, C., Kolisis, F., Time course microarray analysis of tumor gene expression associated with chemoprevention by mastic oil: prediction of putative target pathways, 59th HSBMB, Athens, Greece, December, 2007 (Poster)
- **Moulous, P.**, Chatzioannou, A., Kolisis, F., ANDROMEDA: a platform for versatile 2-coloured microarray analysis platform implemented in MATLAB, 4th Integrative Bioinformatics Workshop, Ghent, Belgium, September 5-7, 2007, AND Thessaloniki, Greece, 2nd HSCBB, December, 2008 (Poster)

Book Chapters

- Chatzioannou, A., **Moulous, P.**: *DNA Microarrays: Analysis and Interpretation*. In: Exarchos, T.P., Papadopoulos, A., Fotiadis, D.I.: *Handbook of Research on Advanced Techniques in Diagnostic Imaging and Biomedical Applications*, 2009.
- Chatzioannou, A., **Moulous, P.**: *Interpretation of Gene Expression Microarray Experiments*. In: Maglogiannis, I., Karpouzis, K., Wallace, B.A., Soldatos, J.: *Emerging Artificial Intelligence Applications in Computer Engineering*, 2007.

Funding

- Stavros Niarchos Foundation, Grant to BSRC 'Alexander Fleming', budget 50,000€
- Elixir-GR, Grant for the extensions of the PANDORA algorithm, budget 25,000€
